

# Digital X-Ray Sensor Sheaths

Individually wrapped TIDIShield Digital X-Ray Sensor Sheaths from TIDI Products provide a custom fit for digital x-ray sensors. The customized fit provided by each single-use, disposable sheath helps reduce the risk of contamination and minimize the potential for bacteria buildup on the imaging instrument.

Additional benefits include soft, rounded edges for greater patient comfort, an easy-peel wrapping to give dental professionals efficient access to the sheath and protect it until time of use, and stringently tested polyethylene film that does not impede instrument function.

SKU	X-Ray Sensor Manufacturer(s)	Sensor Model(s)	Size(s)	UOM
	Suni	Lightyear	1	500 (5 boxes of 100 sheaths)
